PROFILE

B.Tech Computer Science and Engineering student with a 9.05 CGPA, building a strong foundation in programming, data structures, databases, and software development. Currently developing skills in C, C++, Java, SQL, Git/GitHub, and web technologies through academic and personal projects. Seeking opportunities to apply problem-solving skills through software development internships.

PROJECT EXPERIENCE

Simple Line Editor

C Programming Project

- Developed a menu-driven command-line text editor supporting insert, delete, display, search, word count, help, and exit operations.
- Worked on core document operations and designed test cases for validating insertion, deletion, and display functionality.
- Explored extensions including file save/load, find/replace, undo, line count, and word count.

LeetCode Solutions Repository

DSA / GitHub

- Created a structured repository for organizing solutions across arrays & strings, basic algorithms, stacks, and linked lists.
- Practiced problem solving and maintained solutions with clear folder organization and README documentation.

PureSip — Portable Water Purifier Bottle

Innovation & Entrepreneurship

- Worked on a portable water-purification bottle concept aimed at students, travelers, office workers, fitness users, and outdoor enthusiasts.
- Contributed to customer persona, stakeholder analysis, feasibility, competitor analysis, TAM/SAM/SOM, go-to-market planning, and business projections.

EDUCATION

REVA University

Expected 2029

B.Tech — Computer Science & Engineering

Bengaluru, Karnataka

- CGPA:** 9.05 / 10.0

TECHNICAL SKILLS & INTERESTS

- Programming:** C, C++, Java, Python
- Core CS:** Data Structures & Algorithms, OOP, DBMS, SQL
- Tools:** Git, GitHub, VS Code, MySQL
- Other:** IoT basics, Arduino, NodeMCU, MATLAB basics
- Interests:** Software Development; Problem Solving; Data Structures & Algorithms; Open-Source & GitHub Projects
